2. Second task
3. Third task
4. Fourth

New work

I have also done some work

Here is an important idea or proof

Plank's law is cited [1] and reproduced in Eq. 1:

$$\int_0^\infty E_{b,\lambda} d\lambda = \frac{C_1}{\lambda^5 \left[\exp\left(\frac{C_2}{\lambda \cdot T}\right) - 1\right]} \tag{1}$$

- ► Here's a list
- ► With a few items
- ► To guide the talk

A table is necessary

Table: This is a sample table. Note the format specifiers on the header row!

Description	Units	Value
Flux	W/m^2	100.0
Cost	$	13,000,000
Specific heat of the third to last fluid which has a very long wrapped label	$\frac{kJ}{kg \cdot K}$	985

Here is the code for the `tabular` environment:

```
\begin{tabular}{L{1in} !{\wl} c  c}
    \trhead \thf Description & \thf Units & \thf Value \\
    Power & $W$ & 1000 \\
    ...
\end{tabular}
```
